

PTT Microphone Solution with Camera Follow Audio

Adding the Camera Follow Audio Feature dramatically improves the service value of the PTT Microphone system by allowing the end-user to have a video recording of their session, send video to large video monitors, or create a video conferencing session. The Taiden 3600 Main Unit has a 4x1 switcher built in, so the only added hardware is the camera itself. This saves time on set-up and take-down and saves money on transportation and storage.

1. HCS-3600 Main Unit
2. Sony EVI-D70
3. Laptop PC with software
4. (2) 50' Video Cables (RCA to BNC)
5. 50' Camera Control Cable
